# Adversary Village at DEF CON

This is our 2<sup>nd</sup> year at DEF CON

Adversary Village is a community torqued combat readiness platform which purely focuses on adversary tactics, adversary simulation/emulation, threat/APT/Ransomware emulation, breach and attack simulation, supply chain security, adversary life, adversary mindset, philosophy, urban survival skills and purple teaming.

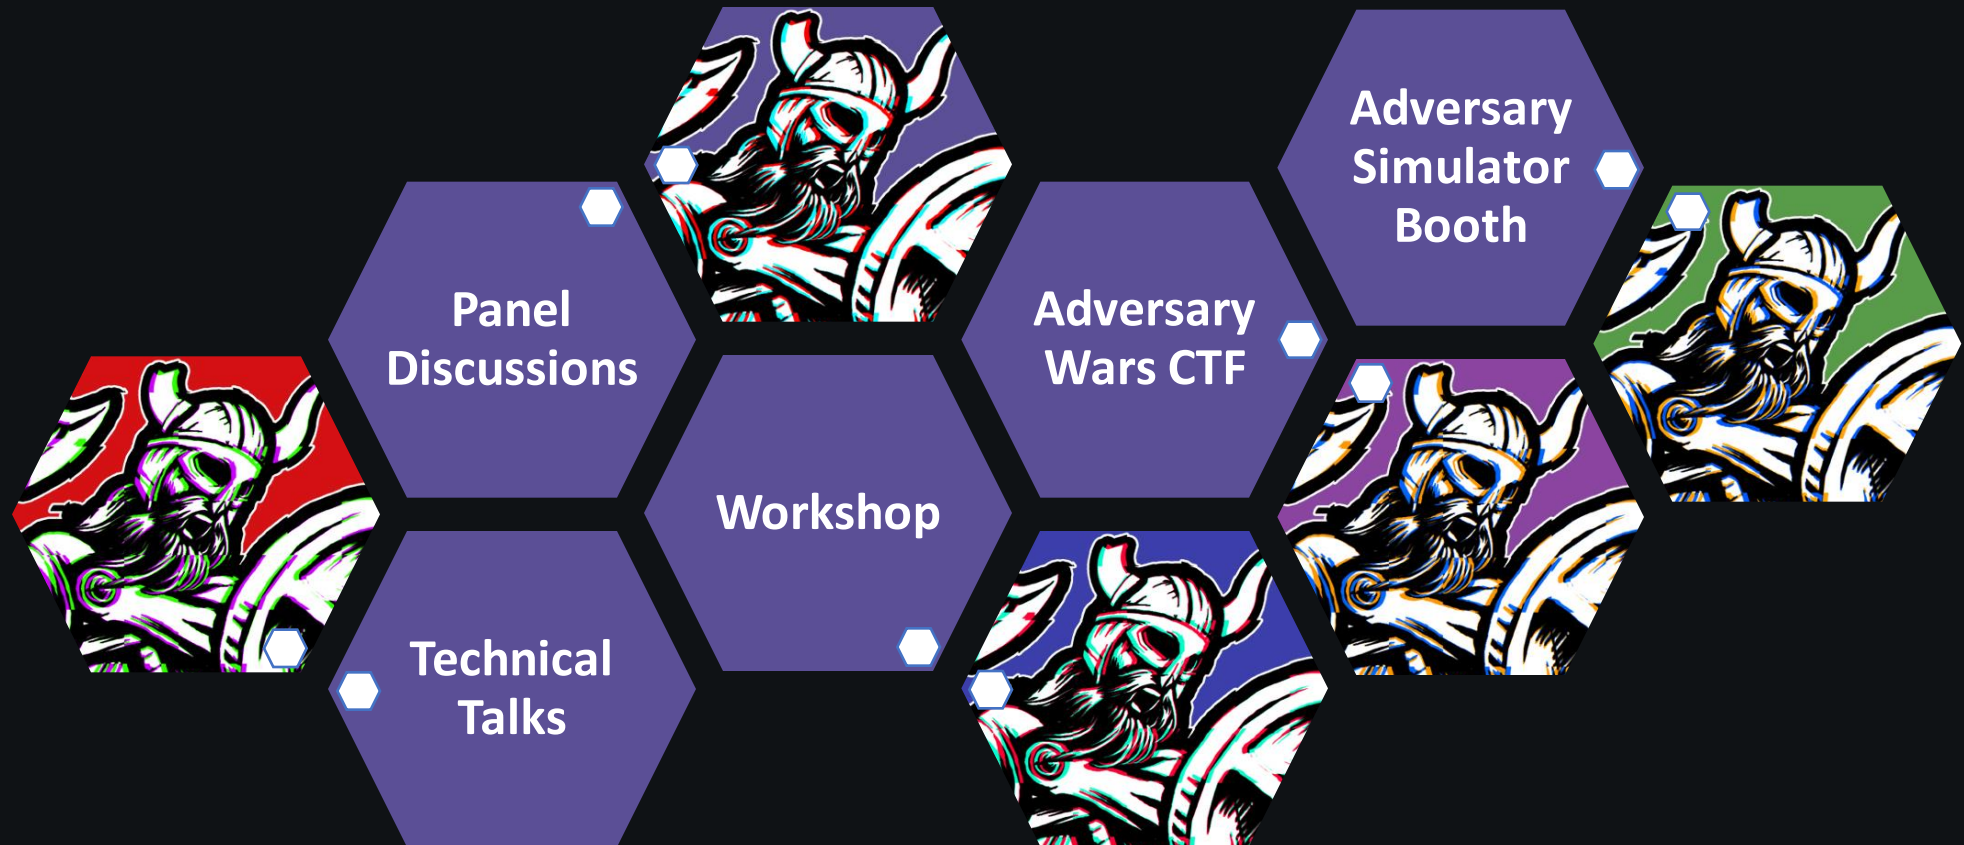

We have hosted the first edition of Adversary Village, as part of DEF CON Villages virtually at DEF CON 29 hacking and cyber security conference, Las Vegas.
